Everyone wishes to succeed in life. For that, one must have a definite goal, a future plan. I too have a future plan of my own. From my boyhood, I cherished a desire to be a doctor, because many people in our country die every year for want of proper treatment. Poor people of the villages suffer most. Seeing all these I have decided to be a doctor. Now I am preparing myself for this. From class IX I have been studying in the Science group with Biology.

I am trying hard to improve my result so that I can get a chance in Medical College. After passing the Exam, I will practice in the village. Not only as a doctor, I will try to serve my countrymen as a social worker also.

To many people success means different things. Some people may see success as being rich and having all of the material things that anyone could ever dream of. Other people may see success as being in a place in their life that they never thought could happen. Some people may see owning their first home as being successful, while others see having a job they have always dreamed of as being a true success. Those, who are under the impression that life is a bed of roses are disillusioned soon and become victims of depression and frustration. One who faces difficulties with courage and accepts success without letting it go to its head is the one who experience real happiness, contentment and peace in life.

I continued to walk around looking for the other half but thought to myself it would be impossible to find it on such a windy day. As I lifted my head, I spotted the other half of the bill tangled in crabgrass. Somehow, finding two halves of a ripped \$5 bill felt better than working for a twenty.
